★★★★★★★★★★★★

More Education =
Lower Unemployment
+ Higher Wages
According to the US Department of Labor

65% of all future jobs will require more education than a high school diploma.
According to the National Skills Coalition

The US Department of Labor considers many computer-related occupations to be "Bright Outlook" careers, meaning demand for workers rising much faster than average!

$100,000+

The average salary for both database administrators and information security analysts in California is over $100,000 a year, according to the US Department of Labor!

6
AVC's Computer Applications program offers six degree and certificate options so students can get the tools they need to succeed in this booming industry.

High-Tech. Higher Salary.

Computers are an integral part of daily life and in California, jobs opportunities in the field are expanding at a rate more than double the national average for all occupations. At AVC, students choose between a variety of degree and certificate programs that can lead to cutting-edge careers with entry-level salaries that start between $67,000 to $75,000 a year!

For those interested in learning how to maintain, support, and secure networks, AVC's Networking and Cybersecurity programs provide hands-on training installing, configuring, and troubleshooting network devices, protocols, and security services using the latest software and technology.

Computer Applications students get the knowledge they need to support business environments with a focus on microcomputer applications in the areas of electronic spreadsheets, electronic presentations, database management, and word processing. In addition, AVC is an authorized CompTIA Education Partner which provides valuable tools and resources to those looking to enter the IT field.

With all of these options, it's no wonder that many graduates go on to succeed in diverse careers with regional employers in occupations like business applications programmer, computer engineer, database specialist, network administrator, and more!
