

What can I do with this major: Business Administration

The Business program offers students the opportunity to recognize and respond to changing economic conditions within the business environment that determine how goods and services are produced, distributed, and consumed in a society. Students will gain the skills and knowledge needed to work within an economic system that rewards firms for their ability to perceive and serve the needs and demands of consumers. Studies in the Business program seek to continue creating strategies that allow companies to grow and compete in today's interactive marketplace by understanding how the private enterprise system encourages competition and innovation while preserving business ethics.
