Universities and colleges Community colleges Specialized academic programs e.g., seminaries, optometrist programs, law schools Academic librarians may work one-on-one with students and faculty, teach and present seminars, or work in technically-oriented positions such as systems design or database management.

Any bachelor's degree in liberal arts is good preparation. Classes in communications, business/management, computer science, and statistics can be helpful.

Related undergraduate subject degree is useful when working with particular specialties such as art or agriculture.

Develop excellent computer skills.

Gain experience in business and management to work in administration.

Work part-time in a college or university library to gain relevant experience.

Earn a master's degree in library or information sciences from a program accredited by the American Library Association (ALA).

Public and private
Public school districts

INFORMATION/STRATEGIES

School librarians or media specialists may help teachers develop curricula, prepare lesson units, team teach, or provide staff development. Many states require a master's degree in library science and some require a specialty certification or an educational endorsement. Some states also require teaching certification or student teaching in a library/media center. Work or volunteer experience related to children and teaching is useful.

Become adept with various technologies and develop strong computer skills.

Learn to work both independently and with groups.

Central libraries Library branches

Library services to jails, retirement homes, nursing homes, hospitals, senior centers, etc.

Some librarians specialize in a particular subject area, such as government collections or technology, or a particular type of materials, such as maps or photography, or with a special population.

Creativity, a flair for drama, and an enjoyment of children are important for those working in youth services. Courses in child development and psychology are helpful in this field.

Develop a broad liberal arts background and earn a master's degree in library or information science from an ALA accredited program.

Build strong computer skills and learn to enjoy working with new technology.

Special collections librarians generally have interests, skills, and knowledge related to the collection and may work with a particular population in special libraries, e.g. lawyers or doctors.

Most positions require a bachelor's degree in a field related to the collection topic, e.g. business, science, art, etc. Some require a graduate degree in the field.

Many law librarians have a Juris Doctor (law degree).

Knowledge of foreign languages may be required in certain fields.

Develop skills in research and a solid background in information technologies.

Earn a master's degree in library or information science from an ALA accredited program.

Professionals involved in information systems help organizations with the storage, retrieval, and management of records or information and support information technology in an organization. An undergraduate degree in management information systems (MIS) or computer science is the preferred background before earning a master's in information science.

Build a strong computer background in programming skills using several languages, various operating systems, database management, software and networks.

Increase employment opportunities through product-related certification or by earning Certified Computing Professional (CCP) status conferred by the Institute for Certification of Computing Professionals. CCP's must pass an examination and meet various requirements.

Gain related experience through internships, co-ops or part-time employment.

Develop excellent analytical, decision-making, and written and oral communication skills.

Learn to work well with both technical and nontechnical staff.

Database producers

Distributors of electronic publications, e.g. business firms, universities, nonprofit organizations, professional associations, etc.

Electronic publishers

Self-employed

Electronic publishers or publishing professionals create and distribute publications in electronic form.

Develop writing skills through classes in English, journalism, or technical writing.

Learn advanced website design and programming. Become fluent in electronic publishing technologies, such as HTML and Adobe Acrobat.

Acquire advanced knowledge of formatting/troubleshooting with electronic templates. (Information/Library Sciences, Page 5)

GENERAL INFORMATION

- Qualifications important to the field include the ability to work well with people, good written and oral communication skills, intelligence and curiosity, research and computer skills. An eye for detail, and a general love of learning are also essential.
- Understanding trends in media, computers/technology, Internet, and publishing is important to success in the profession.
- Virtually any undergraduate degree can offer good preparation for ALA accredited graduate programs.
- Maintain a high grade point average in undergraduate work and secure strong recommendations from faculty.
- Work in campus or community libraries part-time or during the summers to gain exposure to the library environment.
- Supplement undergraduate curriculum with courses in communications, media, business, or technology. Some areas of information or library sciences may require bachelor's or master's degrees related to the job environment.
- Choose master's degree programs in library or information science that are accredited by the American Library Association to maximize employment opportunities.
- Currently, most library science professionals work in school, public, and academic libraries, but employment opportunities are growing most for information specialists in settings such as corporations, consulting firms and information brokers, and in environments involving Internet-based information.
- A doctorate may be required for research and university teaching in library and information science programs or to reach the highest levels of library administration.
- Join professional associations such as the American Library Association.
